PROFESSIONAL SUMMARY

PhD-trained biomedical scientist and experienced educator. Currently teach core biomedical science subjects to healthcare diploma students, including dental hygiene cohorts, and independently develop structured lecture presentations, explanatory notes, exercises and assessment questions. Experienced in scientific quality assurance and translating complex biomedical material into clear instruction.

RELEVANT TEACHING AND SCIENTIFIC EXPERIENCE

2026 - present | External lecturer, EUROPEAN COLLEGE, higher vocational school, Brno. Subjects: anatomy and physiology; microbiology and epidemiology; biochemistry. Develop lesson structure, presentation decks, student handouts, exercises and answer keys. Education for healthcare study programmes.

2023 - present | Postdoctoral research, Masaryk University, Brno. Biomolecular chemistry, bioinformatics, scientific visualization and data interpretation. Scientific writing, reproducibility and student supervision.

2016 - 2021 | University-level teaching. Eleven modules including analytical, structural, functional and general biochemistry; biophysics; enzymology and enzyme engineering; basic programming and UNIX.

EDUCATION

2023 | Ph.D. in Biomolecular Chemistry and Bioinformatics, Masaryk University, Faculty of Science, Czech Republic.

2017 | MSc Biology (Biochemistry); 2016 | BSc-level undergraduate biochemistry training, Belarusian State University.

COURSE AND ASSESSMENT DEVELOPMENT

Foundational anatomy, physiology, biochemistry, microbiology, epidemiology, basic immunology, laboratory science and evidence appraisal for nursing, dental hygiene and allied-health education.

Deliverables: learning outcomes, scientific content architecture, lecture decks, written scripts and study guides, exercises, quizzes, assessment keys, review cycles and source-based factual QA.

Tools and workflow: PowerPoint / Google Slides, MS Teams, Google Docs, scientific visualisation, Python, structured review of specialist content. Moodle / Articulate production proficiency is not claimed.

ENGAGEMENT

Available for a remote, part-time, project-defined freelance engagement. Can contribute biomedical content design, assessment development and QA with a specialist LMS developer when needed. New material and licensing terms agreed before delivery.

English (C2), Czech (C1), Russian (native). Portfolio overview: website above.
